## Longer Lead Times During the Pandemic

Due to the impact of COVID-19, longer lead times are being experienced across the industry.

Eagle Wright's priority remains keeping our employees safe, while continuing to supply you with quality products. Due to high demand and low supplies, please plan well ahead during the pandemic. Be patient while we work on material availability and delivery dates.

### ***What to expect:***

1. Suppliers are impacted by limited staff
2. Medical orders take priority
3. Raw materials are in high demand and low supply
4. The supply chain is experiencing unusually long lead times
5. Due to online shopping, demand for transportation and shipping has increased. This demand has created a shortage of drivers, high volume, and unpredictable delivery schedules. With the holidays upon us, expect delivery delays

### ***What you can do:***

1. Order early: be proactive and place orders well ahead of delivery dates
2. Expect long lead times by adding 1-3 weeks to normal turn times
3. Be patient while we work on material and press availability

We understand 2020 has been stressful for everyone. If you need help, please reach out to your Account Manager for material and delivery status.
